Arbitration of Patent Interference Cases

Agency: Patent and Trademark Office, Commerce
Action: Advance Notice of proposed rulemaking
Summary: Section 105 of the Patent Law Amendments Act of 1984 provides for arbitration of patent interferences cases. The Patent and Trademark Office plans to issue regulations to implement the arbitration provisions of the Patent Law Amendments Act of 1984. Interested individuals are invited to make suggestions and to comment on the proposed rules being considered. A notice of proposed rulemaking could be published as early as Apr. 1, 1985.
Dates: Comments and suggestions should be received by Mar. 1, 1985.
Address: Address written comments to Box 8, Commissioner of Patents and Trademarks, Washington, D.C. 20231 marked to the attention of Fred E. McKelvey (703) 557-4025.
For Further Information Contact: Fred E. McKelvey, by telephone at (703) 557-4025, or by mail marked to his attention and addressed to Box 8, Commissioner of Patents and Trademarks, Washington, D.C. 20231.

Supplementary Information: Section 105 of the Patent Law Amendments Act of 1984, Public Law 98–622, enacted on Nov. 8, 1984, provides for arbitration of patent interference cases. Section 105, codified as 35 U.S.C. §135(d), provides:

Arbitration of Interferen

Parties to a patent interference, within such time as may be specified by the Commissioner by regulation, may determine such contest or any aspect thereof by arbitration. Such arbitration shall be governed by the provisions of title 9 to the extent such title is not inconsistent with this section. The parties shall give notice of any arbitration award to the Commissioner, and such award shall, as between the parties to the arbitration, be dispositive of the issues to which it relates. The arbitration award shall be unenforceable until such notice is given. Nothing in this subsection shall preclude the Commissioner from determining patentability of the invention involved in the interference.

The Patent and Trademark Office (PTO) conducts interference cases to determine who as between two or more applicants for patent or one or more applicants and one or more patentees is the first inventor of a patentable invention. Patent interference cases can be quite expensive. Arbitration may prove useful to minimize expenses in interference cases.

Arbitration will be governed by title 9 of the U.S. Code to the extent that title 9 is not inconsistent with §105 of Public Law 98–622. Within the confines of title 9 of the U.S. Code and §105 of Public Law 98–622, the parties can agree on the procedure to be used in arbitrating a patent interference case. An example of rules which parties might adopt are the Patent Arbitration Rules of the American Arbitration Association (June 1, 1983).

The PTO favors settlement of interference cases, but has not had extensive experience in connection with arbitration of interferences. It has been suggested that patent attorneys and agents likewise may have had little experience with arbitration of patent matters. Field, *Patent Arbitration: Past, Present, and Future,* 24 Idea 235 (1984). The following non-exhaustive list of articles may be helpful to familiarize readers with arbitration in patent matters generally: (1) Field, *supra;* (2) Goldstein, *Arbitrating Disputes Relating to Patent Validity and Infringement,* 72 Illinois Bar Journal 350 (Mar. 1984); (3) Carmichael, *Arbitration of Patent Disputes,* 38 The Arbitration Journal 3 (Mar. 1983); (4) Note, *Arbitration and Intellectual Property: A Survey of Arbitration in Patent, Trademark and Copyright cases,* 48 Albany Law Journal 797 (1984) (the entire Spring 1984 edition of the Albany Law Journal is directed to arbitration issues), (5) Devitt, *International Arbitration of Patent Disputes,* 65 J. In order to provide some basis for comments and suggestions, a proposed §1.690 being considered is set out in this notice.

Paragraph (a) of proposed §1.690 being considered states, consistent with §105 of Public Law 98–622, that parties to an interference may determine the interference or any aspect thereof by arbitration. This paragraph would permit parties to arbitrate the issue of priority based on counts (and claims corresponding thereto) as determined by the PTO and set out in a notice declaring the interference. One issue which might arise in arbitration is the extent to which parties may arbitrate other "aspects" of an interference, e.g., the scope of a count and claims corresponding thereto. Section 105 of Public Law 98–622 vests the PTO with final authority, subject to judicial review, to determine patentability. Hence, interested individuals may wish to consider and comment on the effect of an award which arbitrates the scope of a count (or claims corresponding thereto) or the ultimate issue of priority based on that count where the PTO later determines that the counts or claims corresponding thereto were improper vehicles for deciding priority.

Paragraph (b) of proposed §1.690 being considered states that an arbitration shall take place within such time as an examiner-in-chief may set. The examiner-in-chief would set a time for making an award on a case-by-case basis depending upon the status of the case. For example, if all the testimony had been taken and the only issue for the arbitrator was deciding priority based on that testimony, a relatively short time could be set. On the other hand, if the parties wanted witnesses to appear before the arbitrator, a longer period of time might be needed. Extensions of time for making an award could be obtained under 37 CFR §1.645 (49 F.R.48464 (Dec. 12, 1984)). However, it should be expected that the examiner-in-chief will make a reasonable effort to dispose of the interference within 24 months from the date it is declared. 37 CFR §1.610 (49 F.R. 48457 (Dec. 12, 1984)).

Paragraph (c) of proposed §1.690 being considered would provide that an award shall be in writing and shall be definite with respect to the issue or issues arbitrated and to the disposition of each issue. The arbitration award would have to be signed by the arbitrator or arbitrators and would have to be filed in the PTO within twenty (20) days from the date of the award. As between the parties, the award would be dispositive of the issues arbitrated.

Paragraph (d) of proposed §1.690 being considered states that an arbitration award does not preclude the Office from determining patentability of any invention involved in an interference. Thus, the parties cannot establish *vis-a-vis* the public that subject matter is patentable.

List of Subjects in 37 CFR Part 1

Administrative practice and procedure, Authority delegations, Conflicts of interest, Courts, Inventions and patents, Lawyers.

The proposed rule under consideration would add §1.690 to Subpart E of 37 CFR Part 1 as follows:

§1.690 Arbitration of Interferences

(a) Parties to a patent interference may determine the interference or any aspect thereof by arbitration.

(b) An interference or any aspect thereof shall be arbitrated within such time as may be authorized on a case-by-case basis by an examiner-in-chief.

(c) An arbitration award shall be in writing and shall state in a clear and definite manner (1) the issue or issues which were arbitrated and (2) the disposition of each issue. The parties shall give notice to the Office of an arbitration award by filing within twenty days from the date of the award a copy of the award signed by the arbitrator or arbitrators. When an award is timely filed, the award shall, as to the parties to the arbitration, be dispositive of the issue to which it relates.

(d) An arbitration award shall not preclude the Office from determining patentability of any invention involved in the interference.

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries, receive current issues of U.S. Patents and maintain collections of earlier issued patents. The scope of these collections varies from library to library, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections are open to public use and each of the Patent Depository Libraries, in addition, offers the publications of the U.S. Patent Classification System (e.g. The Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions, etc.) and provides technical staff assistance in their use to aid the public in gaining effective access to information contained in patents. With one exception, as noted in the table following, the collections are organized in patent number sequence.

Facilities for making paper copies from either microfilm in reader-printers or from the bound volumes in paper-to-paper copies are generally provided for a fee.

Owing to variations in the scope of patent collections among the Patent Depository Libraries and in their hours of service to the public, anyone contemplating use of the patents at a particular library is advised to contact that library, in advance, about its collection and hours, so as to avert possible inconvenience.
